

A Note for Foundations Level Science Teachers

For younger students who are not yet independent readers. (This group is appropriate for all students who are beginning to have an interest in reading and basic academics.) Learning the concepts listed below is the goal. The tools and subject matter we play with include the elements of life that these students interact with normally. IE: food, weather, animals, plants, etc.

OBJECTIVES - for group and individual play

Experience and increase awareness of all their senses:

Sight ♦ Sound ♦ Touch ♦ Taste ♦ Hearing ♦ Balance

Using words and drawing pictures to describe new things.

Encourage students to share what they are learning, their thoughts and observations with each other, their parents using things they can bring home (or create and bring home).
